

FEL - Front End Loader

The Front-End-Loader (FEL) Service is one of the most efficient collection services for larger volumes of light compactable general mixed waste and recyclables. This method empties the container on your site into the front of the vehicle, and immediately compacts the waste.

Material types collected include:-

- Compactable Industrial and Commercial Wastes
- Recyclables (paper, cardboard, tins, plastic)
- Cardboard
- Soft Plastics i.e. Polythene, Shrink wrap

Main benefits:-

- Colour Coding allows easy segregation of waste and recycling
- Flexible collection schedules to suit your requirements
- Ad-Hoc Next Day Service for Extra Collections
- Lockable to prevent fly tipping and improve security
- Forklift Pockets allows safe repositioning

container specifications *(for guidance, sizes may differ between manufacturers)*

cubic yards	cum	height (m)	width (m)	depth (m)
8	6.11	2.45	1.87	1.89
