

## REL Rear End Loader

The Rear End Loader (REL) Service is a very efficient collection service for larger volumes of light to medium weight commercial and industrial waste. This method empties into the rear of the container on site which immediately compacts the waste.

### Material types collected include:-

- Mixed Industrial and Commercial Wastes
- Light Mixed Constructions Wastes

### Main benefits:-

- Prompt Next Day Service
- Flexible Collection Schedules to suit your requirements

### Container options:-

- Open Skips
- Fully enclosed and lockable

### container specifications (for guidance, sizes may differ between manufacturers)

cubic yards	cum	height (m)	width (m)	depth (m)
14	10.7	1.98	1.78	4.49
